

## **ABSTRACT OF THE DISCLOSURE**

A foldable lamp shade device includes a housing, a lining mounted in the housing, and a plurality of fixing members mounted between the housing and the lining to combine the housing and the lining together. Thus, the foldable lamp shade device is mounted and detached easily, rapidly and conveniently, thereby facilitating the user assembling and disassembling the lamp shade device. In addition, the lamp shade device can be folded when not in use, thereby greatly saving the cost, space and time of package, storage and transportation.
